

# FlyPi – Workshop

The Workshop organized by Prometheus Science  
for all open source enthusiasts

27.09. – 29.09.2019

Altensteinstraße 40  
14195 Berlin

Registration ends  
02.08.2019

Registration fee  
65€

Prometheus Science is a young startup that develops and sells open source devices. Our first product is the FlyPi. A modular microscope consisting of conventional electronic components and 3D printed components. In this workshop, we would like to assemble a FlyPi together with you and show you its areas of application in practice.

Registration and more information <http://bit.ly/promwork>.  
After the workshop you can take "your self-assembled FlyPi" home.
